

## ***Short Courses in Renewable and Sustainable Energy Studies***

***Develop and enhance your knowledge in renewable and sustainable energy in support of accelerated and shared economic growth in South Africa while earning CPD points.***

Stellenbosch University will present a number of short courses in renewable and sustainable energy studies to enhance the capacity in the country to implement projects in this area. These courses form part of the taught master programmes but each module's week of contact is also registered with ECSA so that participants from industry can typically earn 4.0 CPD points in category 1. The dates for 2009 are as follows:

Solar Energy	18 – 23 May 2009
Renewable Energy Policy	20 – 25 July 2009
Conventional Energy Systems	3 – 8 August 2009
Energy Efficient Cities	10 - 15 August 2009
Sustainable Biomass Production	17 – 22 Augustus 2009
Wind & Hydro Energy	24 – 29 August 2009
Bio-Energy	14 – 19 September 2009
Sustainable Land Use	28 September – 3 October 2009

All the courses will be presented in English by specialists in their field and will include group-work and interaction with other professionals. The venue is the Sustainability Institute based at Lynedoch, near Stellenbosch. Accommodation is available at Lynedoch or in Stellenbosch.
